

VIEWBANK GOES DIGITAL WITH MINECRAFT!

In 2019, the Year 5 students worked collaboratively on an extended Digital Technologies project to re-create Viewbank Primary in **Minecraft: Education Edition**.

They have created a space that is **interactive, informative, and fun to explore**. There are even some characters in the world that you might recognise!

We hope you might like to come and visit eViewbank.

The process of creating our school in Minecraft was not only a fun and **engaging project**, it also developed the **student's skills** in the following **curriculum areas**:

- Design and Technologies
- Digital Technologies
- Geography
- Mathematics
- Media Arts
- Speaking and Listening
- Personal and Social Capabilities
